Fence Posts & Gravel Boards

Elite Precast Concrete precast concrete fencing posts and gravel boards are simple to install and will enhance aesthetic appeal when paired with wooden fencing panels.

The fencing products are manufactured under strict factory quality control measures, ensuring a consistent appearance and top-notch value and combines both privacy and security, whilst providing strength and longevity, particularly against the unpredictable UK weather, by adding overall rigidity to your fence and helping to keep panels in place.

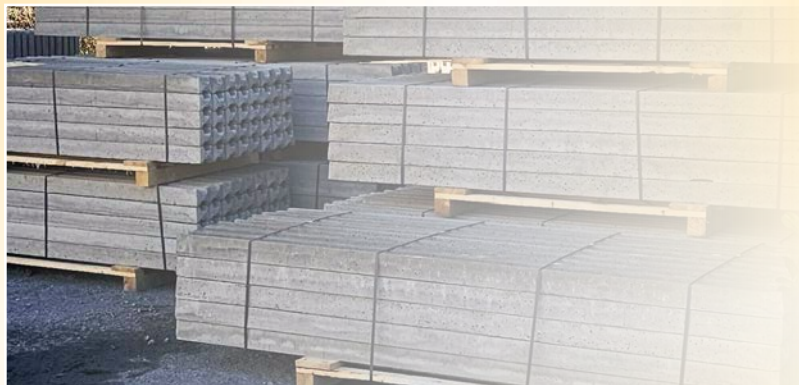

Precast gravel boards serve as a cost-effective solution to minimise environmental damage to timber fencing by mitigating moisture-related issues like rot and decay that can arise from damp ground.

Our off-the-shelf fencing system is not only an effective boundary marker but also acts as a deterrent against theft and unwanted intruders.

Fencing products are available in various sizes for delivery across the UK and are supplied on pallets for easy unloading and quick delivery.

Slotted Fence Posts

Length (mm)	Length (ft)	Weight (kg)	No per pallet
1370	4' 6"	18.0	40
