

Quality precast concrete manufacturers

ELITE
PRECAST CONCRETE

Elite Precast Concrete

Elite Precast Concrete are one of the UK's leading precast concrete manufacturers. Founded by Richard Doody and Alan Johnson in January 2008, the business has gone from strength to strength by combining the highest levels of customer service with always being the best value option.

Our focus is on driving down the cost base and then passing these savings onto our customers. This enables us to provide constant and predictable price structures which in turn underpins our ethos of developing customer relationships over the long term. Indeed, over 65% of our clients have done business with us on at least two previous occasions.

We have a huge range of 'semi-dry' and 'wet-cast' products which we supply to every sector of UK industry imaginable. We have clients including small start ups, private individuals and international blue chip businesses. Every client is cherished and each one receives the highest possible level of personal and professional service.

Our website boasts a huge selection of useful safety, technical and general information... so please feel free to browse there and download anything that might be of assistance.

nationwide delivery and beyond

All of our products are available for delivery nationally and internationally using the range of transport options shown below...

- **Next day courier**
- **Palletforce**
- **Flat bed rigid**
- **Crane off-load rigid**
- **Flat bed artic**
- **Crane off-load artic**
- **Moffett off-load / telehandler off-load**
- **Container shipping / specialised packing services**
available on request
- **FORS Gold, Silver and Bronze / Crossrail / CLOCS**
available on request

We regularly keep over £300K worth of standard products in stock allowing, in most cases, for delivery times of between 24 and 48 hours from receipt of your order.

All our operatives are trained to the highest standards to make sure all products are loaded efficiently and correctly ensuring they reach our customers safely and in premium condition.

We can, of course, also accommodate customers who wish to arrange their own transport and are open for collections...

Monday to Friday 7.00am - 3.30pm & Saturday 7.00am - 11.00am.

Our international destinations have included...

- Ascension Islands
- Australia
- Falkland Islands
- Norway
- Qatar
- Gibraltar
- Saudi Arabia
- United Arab Emirates
- USA

design and manufacture

Elite Precast Concrete is one of the leading manufacturers of low-cost precast concrete products in the UK.

Our in-house technical support and design team are always on hand to offer advice, provide estimates and help with project planning. We work together with our customers to ensure the most cost-effective solution can be achieved.

All our units are made to the highest standards at our two extensive modern manufacturing plants in Telford, Shropshire which cover fifty thousand square feet of production area and two and a half acres of stocking space. Rigorously applied procedures and the latest production techniques ensure consistency and efficiency, enabling us to provide high quality products at the most economic prices.

“...the simple and cost-effective solution provided by Elite’s blocks has meant that we can recycle a material that would otherwise have been disposed of in a landfill site. The blocks were quick to install and we can move them easily should we need to.”

Ian Chattington from Power Plane Ltd

customer solutions

Elite Precast Concrete prides itself on its strong reputation for excellent customer service coupled with a flexibility and desire to find solutions to the most challenging of customer requests.

Our customer service and technical departments are renowned for their ability to modify and adapt our existing 'off the shelf' products to suit the most specific and exacting of requirements. This approach provides the customer not only with a considerable cost saving, from that of a totally bespoke product, but also a production and turn-around time that can be greatly reduced.

However, if this is not achievable, we have all the facilities necessary to produce completely custom-designed products to individual specifications.

By getting involved at the earliest stages of a project we can provide a mutually beneficial partnering solution saving our customers both time and money.

Over 65% of our clients have done business with us on a at least two previous occasions

testing for quality

The quality and consistency of our products is something we take very seriously. We operate within an approved BS EN 1917 quality system.

We are one of the few manufacturers of precast concrete products in the country that can boast of having their own, purpose built, testing facility. We regularly perform a number of tests on both finished products and the materials used to manufacture these products.

Making the grade – aggregate sieve analysis

A sieve analysis, or gradation test, is a procedure used to assess the particle size distribution within aggregates. An aggregate with an acceptable particle size distribution will depend on the particular product that the aggregate is to be used for and the end use that the product is required to perform.

The gradation test is performed on a sample of aggregate and involves a nested column of sieves with wire mesh cloth. A representative weighed sample of aggregate is poured into the top sieve which has the largest screen openings. Each lower sieve in the column has smaller openings than the one above. At the base is a round pan, called the receiver.

The column is then placed in a mechanical shaker and shaken, for a specific amount of time. After the shaking is complete the material on each sieve is weighed. The weight of the sample of each sieve is then divided by the total weight to give a percentage retained on each sieve.

The size of the average particle on each sieve is then analysed to get a cut-off point or specific size range, the results of which are then recorded. The grade and quality of the aggregate is then determined.

Chris May, Sapa Profiles UK Ltd

The Compression Test is a procedure to determine the characteristic strength of the concrete to establish that it is fit for purpose. Although it is a relatively simple test it is extremely important and helps us monitor and maintain the quality and integrity of our products.

Samples are taken from the concrete as it is poured into the product mould and, depending on the product being poured, cast in to a number of either 100mm or 150mm standard cube moulds. The samples are then left to cure under normal conditions. Once the samples have properly set they are removed from the moulds and catalogued with identification and batch numbers.

Cube samples are then placed in to the concrete compression apparatus and crushed to destruction. The test results indicate the maximum compressive strength of the concrete and results are recorded and filed. All the concrete used in Elite products is high strength 50N/mm².

We take regular cores from our products to check concrete strengths and aggregate distribution.

Daily tests are taken for aggregate moisture content, concrete hardness and reinforcement placement to ensure sufficient concrete cover to steel.

There are also several bespoke compression testing rigs to ensure product performance under specified usage conditions.

finance

Our unique finance package

Providing finance for Elite products including our Legato, Duo and Vee concrete block ranges... from Sterling Capital.

Sterling, an established Asset Finance Company who regularly assist Elite Precast Concrete's customers to finance their concrete block purchases, have experience in many sectors including construction, recycling and agriculture. They provide...

- A quick and easy application process
- Terms tailored to suit your requirements
- Hire Purchase or leasing
- Minimum balance to finance of £10,000 - no maximum!
- Can also provide funding for all types of vehicles, equipment, machinery and much more...

Typical example

- Cost of blocks - £30,000 + VAT
- Deposit - One monthly payment + (the full VAT)
- Monthly payments - 3 years @ £966.62 4 years @ £761.44
- Subject to credit approval

Legato® Interlocking Concrete Blocks

Class A1 fire resistant in accordance with clause 4.3.4.4 of EN 13369.

Elite are proud to present the ultimate interlocking block - Legato®, the name coming from the Italian for 'tied together'.

Elite are the only company in Europe to manufacture interlocking blocks using high strength (50N/mm²) concrete. This allows our Legato® blocks to exhibit extreme levels of durability, combined with the flexibility of having their own cast-in lifting pin. As each standard block will build 1.28m² of wall, they provide an incredibly quick solution in a wide variety of applications.

These include...

Support walls for roof structures

Cofferdams

Bay walls

for materials such as...

- Aggregates
- Salt
- Light scrap metals
- Wood chip
- Tyres
- White goods
- RDF waste
- Black bag waste
- Bales etc...

Push Walls

Grain storage

Earth retention Etc etc...

In addition, because the blocks do not contain anything other than high quality, locally sourced aggregates and Portland Cement, you can be assured that your investment will last a lifetime.

See reverse for the full range and specifications.

Please note: The concrete finish of our interlocking blocks is classed as 'Basic' in accordance with the 4th Edition of the National Structural Concrete Specification for Building Construction. <https://formworkdoka.co.uk/2019/08/12/a-guide-to-visual-and-architectural-concrete-finishes/> i.e. there are no requirements other than the concrete being adequately compacted to achieve the density and compressive strength required. The Legato blocks have a moulded face and a trowelled face - where appearance might be of concern, the moulded face tends to offer a smoother and more consistent look. Please note that blocks can be easily damaged if impact occurs during construction and Elite cannot be held responsible for damage caused after the blocks have been delivered and signed for by the client.

Traveling quickly and or traveling over rough terrain when carrying blocks or barriers should be avoided as excessive sudden jerking movements could damage the pin anchor.

For more information on Elite quality concrete products phone 01952 588 885 or browse www.eliteprecast.co.uk

Legato® Interlocking Concrete Blocks

Legato® interlocking block range

Our Legato® blocks come in various sizes – including flat top versions – the standard block is an **LG8 1600mm x 800mm x 800mm** (highlighted in the table opposite) and weighs in at 2400 kgs.

As each Legato® block has its own lifting pin cast into it – you can easily change the way in which they are configured without the need for specialist lifting equipment or grabs.

Durability, strength and availability are the key features of these blocks and a next-day nationwide service means that you are never more than 24 hours away from taking delivery.

Important note: Prior to lifting older / pre-used blocks check the lifting pin for wear / corrosion and check the block for cracks. If the block is cracked or the pin is worn it could fail when being lifted.

Additional Notes: Wind loading can affect the stability of single skin, stand-alone Legato block walls above 4.8m high. If in doubt get it checked by a qualified structural engineer. Direct impact between mobile plant and the block walls is unnecessary and should be avoided as in extreme cases this could dislodge blocks from the wall. If you identify a particular risk then strapping the top layers can help to mitigate the risk.

Legato® Block Code	L x W x H mm	Weight
LG1	400 × 800 × 800	590kg
LG2	400 × 800 × 800	600kg
LG3	800 × 800 × 800	1180kg
LG4	800 × 800 × 800	1200kg
LG5	1200 × 800 × 800	1775kg
LG6	1200 × 800 × 800	1800kg
LG7	1600 × 800 × 800	2365kg
LG8	1600 × 800 × 800	2400kg
LG9	1600 × 800 × 800	1765kg
LG10	1600 × 800 × 800	1800kg
LG11 (Spreader)	1600 × 800 × 800	1800kg
LG12 (Bendi)	1590 × 800 × 800	2240kg
LG12F (Bendi)	1590 × 800 × 800	2240kg
LG14 (Capping)	1600 × 800 × 800	2065kg

Important note:
It is the customer's responsibility to ensure appropriate structural checks are carried out before any precast concrete products are installed.

Duo™ Interlocking Concrete Blocks

Class A1 fire resistant in accordance with clause 4.3.4.4 of EN 13369.

Elite are the UK's only manufacturer of Duo™ interlocking concrete 'lego' blocks - used throughout the UK in a wide variety of applications.

The clever design (which incorporates cast in lifting pin flush with the concrete surface) allows the blocks to be dry laid directly onto a suitable base, creating bay dimensions to suit almost any site. They are easily relocated or reconfigured as your needs dictate.

The blocks can offer a simple and robust alternative to conventional L or A-shaped thin walled panels.

See overleaf for the full range and specifications.

Applications include...

Kentledge blocks
for fencing and hoarding

Cofferdams

Bay walls
for materials such as...

- Aggre-
- Salt
- Light scrap metals
- Wood chip
- Tyres
- White goods
- RDF waste
- Black bag waste
- Bales etc...

Security/property protection

Please note: The concrete finish of our interlocking blocks is classed as 'Basic' in accordance with the 4th Edition of the National Structural Concrete Specification for Building Construction. <https://formworkdoka.co.uk/2019/08/12/a-guide-to-visual-and-architectural-concrete-finishes/> i.e. there are no requirements other than the concrete being adequately compacted to achieve the density and compressive strength required. The Legato blocks have a moulded face and a trowelled face - where appearance might be of concern, the moulded face tends to offer a smoother and more consistent look. Please note that blocks can be easily damaged if impact occurs during construction and Elite cannot be held responsible for damage caused after the blocks have been delivered and signed for by the client.

Traveling quickly and or traveling over rough terrain when carrying blocks or barriers should be avoided as excessive sudden jerking movements could damage the pin anchor.

For more information on Elite quality concrete products phone 01952 588 885 or browse www.eliteprecast.co.uk

Duo™ Interlocking Concrete Blocks

Duo™ interlocking block range

Our Duo™ blocks are the UK's fastest selling interlocking concrete block solution. They come in three sizes - one, two and three connector - the standard block is a **BL2 1200mm x 600mm x 450mm** (highlighted in the table opposite) and weighs 750 kgs.

Speed of construction is a key feature - two men can expect to install 228 blocks per day which is over 123m². The blocks interlock with each other using 'lego' type connectors and are dry-laid making them a reusable semi-permanent option. Capping pieces are also available to give a great looking finish.

A standard articulated lorry carries 38 of the 1200mm blocks although we are happy to deliver any number including single blocks.

Additional Notes: Wind loading can affect the stability of single skin, stand-alone Duo block walls above 4.05m high. If in doubt get it checked by a qualified structural engineer. Direct impact between mobile plant and the block walls is unnecessary and should be avoided as in extreme cases this could dislodge blocks from the wall. If you identify a particular risk then strapping the top layers can help to mitigate the risk.

Duo™ Block Code	L x W x H mm	Weight
BL1 (F)	600 × 600 × 450	375kg
BL1	600 × 600 × 450	375kg
BL2 (F)	1200 × 600 × 450	750kg
BL2	1200 × 600 × 450	750kg
BL3 (F)	1800 × 600 × 450	1125kg
BL3	1800 × 600 × 450	1125kg

Important note: Prior to lifting older / pre-used blocks check the lifting pin for wear / corrosion and check the block for cracks. If the block is cracked or the pin is worn it could fail when being lifted.

Elite Precast Concrete Limited

Important note:
It is the customer's responsibility to ensure appropriate structural checks are carried out before any precast concrete products are installed.

Vee™ Interlocking Concrete Blocks

Class A1 fire resistant in accordance with clause 4.3.4.4 of EN 13369.

Elite are the only manufacturer of a block which locks together both horizontally and vertically, the Vee™ Interlocking Concrete Block.

Originally designed to provide radiation shielding the Vee™ Interlocking block is an incredibly versatile product that will excel in the most demanding of applications. The blocks interlock with each other using a unique 'V' system along the base, sides and top giving incredible strength and stability.

The standard block is a **B1 1830mm x 610mm x 610mm** (highlighted in the table overleaf) and weighs in at 1600kgs. See reverse for the full range and specifications.

Applications include...

Radiations shielding

Counter weights/Kentledge blocks
for hoarding, free standing towers etc,

Flood barriers

Sea defence

Radiation shielding

Soil/aggregate bay walls

RDF/Black Bag Waste

Earth retention

Security barriers

Traffic calming

Please note: The concrete finish of our interlocking blocks is classed as 'Basic' in accordance with the 4th Edition of the National Structural Concrete Specification for Building Construction. <https://formworkdoka.co.uk/2019/08/12/a-guide-to-visual-and-architectural-concrete-finishes/> i.e. there are no requirements other than the concrete being adequately compacted to achieve the density and compressive strength required. The Legato blocks have a moulded face and a trowelled face - where appearance might be of concern, the moulded face tends to offer a smoother and more consistent look. Please note that blocks can be easily damaged if impact occurs during construction and Elite cannot be held responsible for damage caused after the blocks have been delivered and signed for by the client.

For more information on Elite quality concrete products
phone 01952 588 885 or browse www.eliteprecast.co.uk

Vee™ Interlocking Concrete Blocks

Vee™ block types

All blocks measure 610mm square in cross section, but vary in length. B1 blocks are the standard type of block and are identified by having a V-shaped groove (female) on the bottom and one end of the block, and V-shaped projections (male) on the top and opposite end of the block. The direction of build is the direction in which the male projections should be pointing when assembling the wall.

B2 blocks are identical to B1 blocks with the exception that the male projection on the end of the block has been removed leaving a flat surface. The blocks are used to butt up to blocks which are at 90 degrees to the direction of build. They are also used at the end of walls to produce a smooth finish to the wall.

Important note: Prior to lifting older / pre-used blocks check the lifting pin for wear / corrosion and check the block for cracks. If the block is cracked or the pin is worn it could fail when being lifted.

Vee™ Block Code	L x W x H mm	Weight
B1-610	610 × 610 × 610	533kg
B1-915	915 × 610 × 610	800kg
B1-1220	1220 × 610 × 610	1067kg
B1-1525	1525 × 610 × 610	1333kg
B1-1830	1830 × 610 × 610	1600kg
B2-610	610 × 610 × 610	533kg
B2-915	915 × 610 × 610	800kg
B2-1220	1220 × 610 × 610	1067kg
B2-1525	1525 × 610 × 610	1333kg
B2-1830	1830 × 610 × 610	1600kg
C1-1525	1525 × 610 × 610	1333kg
C2-1525	1525 × 610 × 610	1333kg
T2-1525	1525 × 610 × 610	1333kg
FB-610	610 × 610 × 610	533kg
FB-915	915 × 610 × 610	800kg
FB-1220	1220 × 610 × 610	1067kg
FB-1525	1525 × 610 × 610	1333kg
FB-1830	1830 × 610 × 610	1600kg
HB-610	610 × 610 × 305	266kg
HB-915	915 × 610 × 305	400kg
HB-1220	1220 × 610 × 305	533kg
HB-1525	1525 × 610 × 305	666kg
HB-1830	1830 × 610 × 305	800kg

Additional Notes: Wind loading can affect the stability of single skin, stand-alone Vee block walls above 4.27m high. If in doubt get it checked by a qualified structural engineer. Direct impact between mobile plant / heavy machinery and the top row of interlocking blocks walls should be avoided at all times as this could dislodge blocks from the wall.

C1 and C2 blocks (combination blocks) interlock courses at corners. As well as having the usual groove in the bottom of the block, combis have transverse grooves running across the width of the block. This is designed to lock the blocks in the course below. C1 blocks, (as with B1 blocks), have the male V projection on the end of the block. C2 blocks have a flat male end as with B2 blocks.

T2 blocks are specifically designed for the formation of intermediate bay walls. These blocks have a flat male face.

There are also a series of flat top coping blocks, these being standard 610 depths (FB blocks), or 305 depths (HB blocks).

Important note:

It is the customer's responsibility to ensure appropriate structural checks are carried out before any precast concrete products are installed.

Kentledge Blocks

Precast concrete kentledge blocks are used to act as ballast or counterweights for fencing, hoarding, scaffolding, or for various temporary works. By using precast concrete kentledge blocks for above ground/no-dig fencing and hoarding systems you avoid the risk of costly service strikes. They can also be attached to wire ropes which are fixed to the structure to provide greater stability.

The Elite Kentledge block range also have huge advantages over other counterweight solutions in that they are 100% recyclable (i.e. they are cast from simple and pure Portland Cement and Quarried, locally sourced aggregates), reusable (the blocks have many other uses) and resalable (the vast majority of Elite's Kentledge blocks supplied to major projects are eventually re-sold to create material storage bays after their primary job is completed).

Elite's huge variety of 50N/mm² blocks means that whatever the application we will have a block or combination of blocks that will meet your requirements.

Our blocks are used extensively by maritime fabrication businesses for use in the off-shore wind turbine sector, as counterweights for dock-side cranes (for example as strand jack guy rope anchors) and are used extensively in dry docks for ship supports.

Supplier of precast concrete kentledge blocks to the London 2012 Games (Olympic venues)

Traveling quickly and or traveling over rough terrain when carrying blocks or barriers should be avoided as excessive sudden jerking movements could damage the pin anchor.

Prior to lifting older/pre-used blocks check the lifting pin for wear/corrosion and check the block for cracks. If the block is cracked or the pin is worn it could fail when being lifted.

Counterweight Blocks

Our security blocks, Interlocking concrete blocks and Vee™ interlocking blocks all make excellent counterweight blocks for fall arrest systems, heavy lifting equipment etc., they are also perfect for most types of temporary works situations.

Elite blocks are used extensively by maritime fabrication businesses for use in the off-shore wind turbine sector and by companies in the on-shore wind farm / wind turbine industries, as counterweights for port / dock-side cranes (for example as strand jack guy rope anchors) and are used extensively in dry docks for ship supports.

Important note:

Prior to lifting older / pre-used blocks check the lifting pin for wear / corrosion and check the block for cracks. If the block is cracked or the pin is worn it could fail when being lifted.

Sea Anchor Blocks

We are delighted to present our new range of Precast Concrete Sea Anchors.

Available in a wide range of sizes with a choice of galvanised steel lifting and guide hoops, with integral feet to help locate the blocks into the sea bed.

We also manufacture to suit customer requirements - please call for further information.

Temporary Vertical Concrete Barriers

Elite's Temporary Vertical Concrete Barriers (TVCBs) are the perfect safety barrier for a huge variety of applications including many types of temporary works. They also make ideal Vehicle Security Barriers (VSBs).

They are cast from Elite's highly regarded high strength concrete (50N/mm²) which, combined with approved steel reinforcing, means that the barriers meet the requirements of EN 1317 'Compliant Road Restraint Systems for Temporary Safety Barriers' (see table overleaf).

Important note - The barriers are manufactured to a design which has been tested and approved by Hardstaff Barriers Ltd / Hill and Smith plc

Traveling quickly and or traveling over rough terrain when carrying blocks or barriers should be avoided as excessive sudden jerking movements could damage the pin anchor.

TVCBs

For more information on Elite quality concrete products
phone 01952 588 885 or browse www.eliteprecast.co.uk

Temporary Vertical Concrete Barriers

TVCBs

TVCBs have a multitude of uses including...

- To create a safe working area for your workforce
- To provide flood defences
- Protecting pedestrians from traffic
- Providing traffic barriers / bases for secure fencing to be fixed to (particularly useful for large public events such as the Olympics / Commonwealth games)
- Preventing un-authorised access to forecourts, car parks, fields and site compounds
- Helping direct traffic flows safely
- As counterweights, kentledge for scaffolding, fencing, cranes, etc
- Proving security against ram raiders and terrorist attacks

The units are connected together at the scarf joint by M24 high tensile bolts.

Elite's TVCBs are always available direct from stock for nationwide next day delivery.

TVCB's should only be lifted/off-loaded from above using the central 5 tonne pin anchor and clutch or the four M24 threaded sockets and lifting loops

A crane off-load and place service is available - please call 01952 588 885 for further details.

Important note: Prior to lifting older / pre-used blocks check the lifting pin for wear / corrosion and check the block for cracks. If the block is cracked or the pin is worn it could fail when being lifted.

Temporary Vertical Concrete Barriers

Type	Overall length	Modular length	Height	Width	Weight

Important note:

It is the customer's responsibility to ensure appropriate structural checks are carried out before any precast concrete products are installed.

Jersey Barriers

The Elite Jersey barrier is an interlocking heavy duty system designed for the ultimate in anti-vehicle perimeter protection.

Cast from Elite's standard high-strength concrete (50N/mm²) the barriers are quick and easy to install and are available direct from stock for next-day nationwide delivery.

The interlocking Jersey barriers are ideal for traffic management, flood defence, site security, rockfall, edge protection as well as for various temporary works.

For more information on Elite quality concrete products
phone 01952 588 885 or browse www.eliteprecast.co.uk

Jersey Barriers

Jersey Barriers

Our Jersey barriers are 2500mm long and weigh 1450kg. The unique interlocking system provides incredible levels of security against unwanted visitors whilst allowing sections to be easily removed and repositioned should emergency access be required.

The barriers are available for delivery on a self-install basis using a standard forklift truck. Alternatively our experienced and fully-trained installation team can deliver and place them anytime, anywhere.

It is the customer's responsibility to ensure appropriate structural checks are carried out before any precast concrete products are installed.

Tank Trap Pyramid Barriers

To give your security real strength, whether it's to prevent vehicles being stolen or possible terrorist attacks, you need the complete, cost-effective perimeter security provided by our tank trap barriers.

The pyramidal design has been specially designed to stop any size vehicle driving over them without being impaled. Each 2500kg unit consists of three 850mm square pyramids with interlocking connectors that just slot into place, making this simple system highly secure - whatever the length of your site perimeter. Also available as single pyramid units.

For more information on Elite quality concrete products
phone 01952 588 885 or browse www.eliteprecast.co.uk

Tank Trap Pyramid Barriers

Features

- Available in one or three-pyramid modular units
- 850mm high pyramids impale vehicles
- Simple interlocking design
- Easy installation
- Integral pin anchor lifting points
- High strength 50N/mm² concrete
- Good quality with smooth finish
- Ideal for perimeter security at outdoor events, airports, MoD premises, power stations, vital infrastructure installations, car storage etc.

Bollards

Elite Precast Concrete bollards are cast from Elite's standard high strength concrete (50N/mm²) and are perfect for a variety of uses such as traffic management, perimeter security and pedestrian safety.

Concrete bollards offer several advantages over steel in terms of strength, durability, and the lack of maintenance required.

Benefits include:

Easy to install

Generally maintenance free

Suitable for both urban or rural applications

Reinforced with a steel for extra strength

For more information on Elite quality concrete products
phone 01952 588 885 or browse www.eliteprecast.co.uk

Bollards

Bollards

Elite's concrete bollards are designed to withstand vehicle collisions and offer resistance against vandalism or unauthorised access.

They can be installed in high-security areas, such as government buildings, airports, or critical infrastructure, to prevent vehicle entry and protect against potential threats.

They can also be used for traffic control and can be strategically placed to guide vehicle flow, prevent illegal parking, or define traffic lanes.

Often used as a barrier to protect pedestrians they can be installed along pavements or pedestrianised zones to prevent vehicles from encroaching into unauthorised or restricted areas and to improve overall safety.

Concrete bollards are cylindrical and can be painted or finished in different colours to enhance visibility or match the surrounding environment.

They can also be customised to suit specific needs and aesthetic preferences such as reflective strips or signage mounted to them for improved visibility,

Elite's concrete bollards require minimal maintenance making them a cost-effective choice over the long term.

Important note: Please consider the weight and installation requirements when choosing concrete bollards, as they may need specialised equipment for placement.

Additionally, local regulations and standards should be followed to ensure proper installation and compliance with safety guidelines. Consulting with professionals or local authorities is recommended when considering the use of concrete bollards in specific projects or environments.

Security Blocks

We offer a range of options when it comes to securing your premises against unwanted visitors, to manage site traffic and for use as HGV MOT test weights.

You can choose from the Security block, the Vee™ interlocking block, the Legato™ interlocking block, the Duo™ interlocking block or from our Marquee block ranges. Not only do these blocks provide security solutions they can also be used for various temporary works applications.

All systems come with integral lifting options and can be painted in your company logo/colours, Ministry of Transport approved chevrons, etc... and provide a much cheaper alternative when compared to hiring-in barriers.

Traveling quickly and or traveling over rough terrain when carrying blocks or barriers should be avoided as excessive sudden jerking movements could damage the pin anchor.

For more information on Elite quality concrete products
phone 01952 588 885 or browse www.eliteprecast.co.uk

Security Blocks

Security Block

Our large two tonne precast concrete blocks are designed and manufactured to be used as security blocks preventing access to land and buildings and are ideal for blocking entrances and gateways or for use as HGV MOT test weights.

All of the blocks have their own lifting and placing systems and can be delivered and installed by our specialist team using the...

Forklift/Telehandler slots

Channels... Ducts... Troughs

Precast concrete ducting is a system that allows for the accommodation of a number of different services from multiple utility and building providers.

Elite's Precast channels and lids are designed and manufactured to comply with the loading criteria as set out in accordance with the provisions within BS EN 1433 (channels) and BS EN 124 (lids).

The trough and lid system has a number of distinct advantages over direct bury and overhead suspension including...

PROVIDING A PROTECTIVE BARRIER FOR SERVICES AGAINST ACCIDENTAL DAMAGE

ACTING AS A CLEAR INDICATION OF UTILITY INSTALLATIONS

EASY ACCESS FOR MAINTENANCE AND REPAIRS

HIGH LEVELS OF SECURITY

Applications include the housing/ transportation of...

Electric cables

Gas pipes

Steam pipes

Water

Sewage

Slurry

Fibre optic cables

or multiples of the above.

Cable Protection Covers

Concrete Cable Protection Covers, also known as Cable Route Markers, are used frequently by utility companies to provide a clear indication to site staff who may be working close to underground electrical cables.

Covers act as a protective barrier against damage to buried electricity cables eliminating the risk of accidents and costly repairs. They can also be used to locate and identify other underground services.

Protection covers are reinforced precast concrete units manufactured and tested to BS2484 specifications. The covers are imprinted, as standard, with the words 'DANGER ELECTRICITY' and are available in five sizes.

For more information on Elite quality concrete products
phone 01952 588 885 or browse www.eliteprecast.co.uk

Cable Protection Covers

Cover types

Concrete Cable Protection Cover Tiles (also known as Cable Route Markers) are manufactured to BS 2484 and imprinted as standard with the indented lettering warning legend DANGER ELECTRICITY and the internationally recognised Danger Sign.

There are five standard sizes available as shown below.

Indicator Posts

Precast concrete indicator posts are widely used by utility companies and are installed to assist the location and identification of underground services.

Marker posts are made from reinforced precast concrete, manufactured and tested to BS 1881 standards.

They are available in a variety of types and sizes.

For more information on Elite quality concrete products
phone 01952 588 885 or browse www.eliteprecast.co.uk

Indicator Posts

Post types

We manufacture several standard marker posts in accordance with BS 1881, details of which are shown in the table opposite.

Marker posts are available with or without anchor bases.

Hydrant post have preformed holes to accept plates within.

Any other requirements can be made to order.

Marker Blocks

Precast concrete marker blocks are primarily used to aid in the location and identification of electric cables and other utility services that are buried underground. They can also be used to mark boundaries and other reference points.

They are made from precast concrete and are manufactured and tested in accordance with BS 1881 standards.

Available in a range of standard sizes with various legends, however any size or wording can be produced on a bespoke basis.

For more information on Elite quality concrete products
phone 01952 588 885 or browse www.eliteprecast.co.uk

Marker Blocks

Block types

Marker Blocks are manufactured in accordance with BS 1881 and standard blocks are listed in the table opposite.

Where applicable blocks have a recess on the underside which houses a 6mm galvanised bar to enable cable draw ropes etc. to be attached.

The standard recess size for identification plates is 100mm x 75mm.

Any other requirements can be made to order.

Utility and Pipe Protection Slabs

Our utility and pipe protection slabs are made from precast concrete and heavily reinforced with steel. They can be used to protect a range of vulnerable utilities such as water pipelines, high pressure gas mains and power cables from damage from above-ground traffic.

Three standard sizes are available that are all reinforced with heavy duty mesh to give you more choice.

Protects from mechanical excavations.

Both faces come reinforced with heavy-duty mesh.

Interlocking slabs allow for easy installation and ensure rigid construction.

For more information on Elite quality concrete products
phone 01952 588 885 or browse www.eliteprecast.co.uk

Utility and Pipe Protection Slabs

Slab types

Three standard sizes are available that are all reinforced with heavy duty mesh to give you more choice.

Used to protect high pressure gas mains and high voltage cables, particularly for areas vulnerable to rogue excavations.

Utility and Pipe Protection Slab

Width	Length	Depth	Weight
2500mm	1000mm	150mm	900kg
3000mm	1000mm	150mm	1090kg
3500mm	1000mm	150mm	1270kg

Utility slab showing reinforcing mesh on both faces

Important note: Prior to lifting older / pre-used blocks check the lifting pin for wear / corrosion and check the block for cracks. If the block is cracked or the pin is worn it could fail when being lifted.

Seating Rings/Adjusting Units

Concrete frame adjusting/seating rings are reinforced 65mm deep units which can be used in place of engineering bricks to adjust the ductile or cast iron covers and frames to the required level.

They can be quickly and easily installed by semi-skilled labour and there are fewer joints which reduce the likelihood of infiltration.

Our multi-part adjusting units offer the advantage of light weight sections enabling one man to handle the units and comply with manual handling regulations.

For more information on Elite quality concrete products
phone 01952 588 885 or browse www.eliteprecast.co.uk

Seating Rings/Adjusting Units

Seating/adjusting types

Manhole Seating Rings are manufactured to BS 5911-3 standard in the following sizes...

One-part Seating Rings

600mm x 600mm access
675mm x 675mm access
750mm x 600mm access
750mm x 750mm access

Dam Spillway Blocks

Precast concrete wedge-shaped blocks which use the hydrodynamics of the water flow to achieve immense stability in high velocity open channel conditions such as those found on dam spillways.

The blocks are bespoke-manufactured to suit specific design and technical data.

Applications include:

Dam overtopping

High velocity channels

Primary and secondary spillways

For more information on Elite quality concrete products
phone 01952 588 885 or browse www.eliteprecast.co.uk

Dam Spillway Blocks

Dam Spillway Blocks are a concrete-step-overlay-protection-system for embankment dams and spillways that are subject to high forces associated with overtopping flow. The downward weight (positive force) of the block and the uplift pressure (negative force) of the flowing water allow the system to remain stable. An effective drainage network - allowing water to be removed from beneath the system - is essential to the design of the overlay.

The practicality of our Dam Spillway Blocks lies in their cost-effective ease of installation. This is particularly true for projects where the use of large machinery is deemed impractical due to confined, hard-to-reach jobsites or environmental impact on the surrounding area. Dam Spillway Blocks are typically installed over site-specific filter fabric and subsequent drainage medium on a well-compacted surface.

Elite Concrete terms & conditions of sale

1. GENERAL

(i) All contracts for the supply of goods and/or services between Elite Precast Concrete Limited ("the Company") and yourself ("the Customer") are subject to the following terms and conditions ("the contract") which shall apply to the exclusion of any terms or conditions whatsoever whether express, implied by law or otherwise including but not limited to the terms of specification in whole or in part. You acknowledge that you have not relied on any statement, promise or representation made or given by or on behalf of the Company which is not set out in the contract. Nothing in this condition shall exclude or limit the Company's liability for fraudulent misrepresentation.

(ii) No amendment or variation of any of these terms and conditions shall be valid unless expressly agreed in writing by a duly authorised representative of the Company.

(iii) Any advice or recommendation given by the Company or its employees or agents to the Customer or its employees or agents as to the storage, application or use of the goods which is not confirmed in writing by the Company is followed or acted upon entirely at the Customer's own risk, and accordingly the Company shall not be liable for any such advice or recommendation which is not confirmed.

2. QUOTATION

(i) Each order or acceptance of a quotation for goods and/or services by you from the Company shall be deemed to be an offer by you to purchase goods and/or services subject to these conditions.

(ii) No quotation shall constitute an offer or tender but shall be deemed to be an invitation to treat.

(iii) Any quotation is given on the basis that no contract shall come into existence until the Company despatches an acknowledgement of order to you. Subject to clause 4(ii) any quotation is valid for a period of 60 days only from its date, provided that the Company has not previously withdrawn it.

(iv) You shall ensure that the terms of its order and any applicable specification are complete and accurate.

3. CONTRACT

Your written confirmation order is required prior to the date of delivery or this acknowledgement is deemed to be correct. A contract for the supply of goods or services is constituted by the despatch by the Company of its written acknowledgment of order, and the date of the contract shall be the date of the said written acknowledgment order. It is preferable for manhole orders to be accepted with completed schedules.

4. PRICES

(i) Unless otherwise specified in the quotation, all prices quoted are exclusive of value added tax, excise duties and import duties where applicable, and all costs or charges in relation to unloading and insurance, all of which the Customer shall pay in addition when it is due to pay for the goods or services.

(ii) Notwithstanding clause 2(iii) the Company reserves the right in its absolute and unfettered discretion to vary the price from that quoted in the event of any variation in the cost of materials, labour, services, interest rates, transport and statutory charges between the date of contract and the date of despatch.

5. TECHNICAL DRAWINGS ETC.

(i) All technical drawings, catalogues or manuals produced by the Company and submitted to the Customer in connection with the supply of goods or services between the company and the Customer, either prior to the formation of a contract or to the goods being delivered to the Customer shall (without prejudice to the provisions of Clause 16) be strictly adhered to by the Customer.

(ii) All quotations, drawings or technical documents submitted to the Customer prior to or subsequent to the formation of a contract remain the exclusive property of the Company and are returnable to the Company on request. They may not be used by the Customer or copied, reproduced, transmitted in any form or any means including photocopying or communicated to a third party except with the prior written consent of the Company given by a duly authorised representative of the Company.

6. LICENCES AND PERMITS

If the performance of any contract requires a licence or other permit of any government or authority to be granted to the Company, the Customer shall be responsible for obtaining the same and the contract shall be conditional upon such licence or permit being available at the relevant time and if it is not so available the Company shall be entitled to cancel the contract by giving the Customer written notice to that effect. Should any such licence or permit not be available at the relevant time, the Customer shall be liable for any costs or expenses incurred by the Company in the performance of the contract as a result of such delay or, where the contract is cancelled, up to the date of its cancellation.

7. PAYMENT

(i) Unless otherwise agreed in writing between a duly authorised representative of the Company and the Customer, payment for any goods shall be made by the Customer to the Company in pounds sterling within 30 days of the end of the month in which an invoice is delivered or deemed to be delivered.

(ii) Time for payment shall be of the essence.

(iii) No payment shall be deemed to have been received until the Company has received cleared funds.

(iv) All payments payable to the Company under the contract shall become due immediately on its termination despite any other provision.

(v) The Customer shall make all payments due under the contract in full without any deduction whether by way of set-off, counterclaim, discount, abatement or otherwise unless the Customer has a valid court order requiring an amount equal to such deduction to be paid by the Company to the Customer.

(vi) The Company reserves the right to charge the Customer interest upon any overdue payment or part thereof at the rate of 4% per annum above the base rate of The Bank of England from time to time in force until the date of actual payment.

8. DELIVERY

(i) Although the Company will endeavour to meet any date or time quoted or given for delivery of the goods, such date or time is an approximate estimate only. In respect of delivery time it shall not be of the essence.

(ii) Subject to the other provisions of these conditions, the Company shall not be liable for any direct, indirect or consequential loss (all three of which terms include, without limitation, pure economic loss, loss of profits,

loss of business, depletion of goodwill and similar loss) costs, damages, charges or expenses caused directly or indirectly by any delay in the delivery of the goods (even if caused by the Company's negligence), nor shall any delay entitle the Customer to terminate or rescind the contract unless such delay exceeds 180 days.

(iii) The Company reserves the right to despatch and invoice any part of an order when available.

(iv) Where the goods are to be delivered by instalments each delivery shall constitute a separate contract and any failure by the Company to delivery or any claim by the Customer in respect of any one or more instalments shall not entitle the Customer to treat the contract as a whole as repudiated.

(v) The Customer shall provide at its expense adequate and appropriate equipment and manual labour for unloading the goods.

(vi) Upon receipt of the goods the Customer, his employee or agent shall sign a delivery note provided by the Company. Such delivery note shall be confirmation by the Customer to the Company that the goods have been visually inspected and found to be satisfactory.

(vii) Pallets are charged at the current list price which is invoiced at the time of delivery and is credited on the return of the undamaged pallets within three months of delivery. The return of pallets is the responsibility of the Customer. No credit will be given for the return of undamaged pallets unless the Customer is able to produce a clear signature by one of the Company's drivers or employees on the Company's stationery acknowledging receipt of the return of the undamaged pallet.

9. DEMURRAGE

When the Company delivers goods to the Customer, the Customer shall unload the goods within a period of one hour from the arrival of the goods at the Customer's site or place of business. In the event of the Customer failing to do this, the Customer shall pay any additional costs incurred by the Company.

10. DAMAGE OR LOSS IN TRANSIT

(i) The quantity of any consignment of goods as recorded by the Company upon despatch from the Company's place of business shall be conclusive evidence of the quantity received by the Customer on delivery unless the Customer can provide conclusive evidence proving the contrary.

(ii) The Company shall not be liable in respect of any loss or damage whatsoever arising in transit or from non-delivery of goods howsoever caused unless notice in writing of the same is given to the Company within the period specified in the contract of carriage between the Company and any carrier or within one working day of the date when the goods were received or would in the ordinary course of events have been received.

(iii) Any liability of the Company for non-delivery of the goods shall be limited either (at the Company's sole discretion) to replacing the goods within a reasonable time or issuing a credit note at the pro rata contract rate against any invoice raised for such goods, or payment to the Customer of any sums received pursuant to any contract of insurance provided by the carrier.

11. STORAGE

(i) If the Customer fails to take delivery of the goods within 7 days of the date of notification that the goods are ready for collection or the Company is unable to deliver the goods on time because the Customer has not provided appropriate instructions, documents, licences or authorisations, if forwarding instructions are not received within 7 days after the date of notification that the goods are ready for despatch, the Customer shall arrange for storage. If the Company agrees to store the goods then

(a) risk in the goods shall pass to the Customer (including for loss or damage caused by the Company's negligence);

(b) the goods shall be deemed to have been delivered; and

(c) the Company may store the goods until delivery, whereupon the Customer shall be liable for all related costs and expenses (including, without limitation, storage and insurance).

12. RISK

Unless otherwise agreed in writing the moment when the risk in the good shall pass shall be determined as follows:

(i) On a "sale delivered" the risk shall pass from the Company to the Customer when the goods are despatched by the Company.

(ii) On a sale "ex-works" the risk shall pass from the Company to the Customer when the goods have been placed at the disposal of the Customer; and

(iii) Where the Company has quoted for any installation and/or fabrication of the goods the on site risk in the goods shall pass from the Company to the Customer on delivery of the goods to site.

13. TITLE

(i) Notwithstanding delivery and passing of the risk in the goods supplied by the Company to the Customer pursuant to clause 12 hereof the property and title in the goods shall not pass to the Customer and shall remain with the Company until the Company shall have received in cash or cleared funds payment in full of the price of the goods and all other goods agreed to be sold by the Company to the Customer for which payment is then due.

(ii) Until the property and title in the goods passes to the Customer pursuant to the provisions of sub-paragraph (i) hereof the Customer shall keep the goods as bailee of the Company and in this connection shall set aside the goods separately from other goods in the Customer's possession and ensure that the goods are carefully stored and remain identified as the property of the Company.

(iii) If at any time before the property and title in the goods passes to the Customer pursuant to the provisions of this clause 13, the Customer sells the goods or any part thereof he shall do so as bailee and shall account to the Company as agent of the Company for the proceeds of sale thereof.

(iv) The Company shall be at liberty at any time before the property and title in the goods passes to the Customer pursuant to the provisions of sub-paragraph (i) hereof to require the goods to be returned to it and if the requirement is not immediately complied with by the Customer the Company may re-take possession thereof and may enter any premises or sites of the Customer or any other premises or sites where the goods may be for such purpose. Such return or repossession shall be without prejudice to the rights of the Company

...continued overleaf

...terms & conditions

to recover all sums owing by the Customer to the Company and to the Company's rights to claim damages against the Customer for the breach of any obligations on the part of the Customer arising under the contract. Any expenses incurred in such return and re-possession of the goods or any damage caused to any land and/or site by the Company in exercise of its powers hereunder shall be borne by the Customer.

(v) Until ownership of goods passes to the Customer the Company or any person nominated by it shall be entitled to enter on to the Customer's site from time to time for the purpose of:

- (a) Ensuring that the Customer has complied with the provisions of sub-paragraph (ii) hereof; and
- (b) Inspecting all books, accounts, records, documents and papers of the Customer for the purpose of determining sums due to the Company by virtue of the provisions of sub-paragraph (iii) hereof.

14. TRADEMARKS, WARRANTIES AND COLOUR

(i) The Company shall be entitled to write or affix its imprint on the materials in the usual manner. Where the Company's patents, registered trademarks or copyright features are included in the design an imprint to that effect may be affixed.

(ii) Save as expressly incorporated into the Contract by a quotation or by a tender, no specification, illustration, drawing, brochure, catalogue or other information sent or made available by the Company to the Customer or any term or representation made by any servant or agent of the Company shall have any contractual effect.

(iii) No guarantee or warranty is given that these goods are designed or suitable for the purpose of which they may be intended.

(iv) Samples are only submitted as indicative of the product quoted for without any guarantee as to the colour or quality of the bulk. All quotations are made on the basis that sales are by description and not by sample, unless otherwise agreed specifically by the Company in writing.

(v) Materials are supplied subject to natural formation characteristics, colour and marking variations.

15. QUALITY

(i) The Company warrants that (subject to the other provisions of these conditions) that upon delivery the goods shall be of satisfactory workmanship and materials and goods of their respective kind generally in accordance with the relevant British Standard.

(ii) The Company shall not be liable for a breach of the warranty in sub-paragraph (i) hereof unless:

- (a) the Customer gives written notice of the defect to the Company, and, if the defect is as a result of damage in transit by the carrier, within 7 days of the time when the Customer discovers or ought to have discovered the defect and in any event not later than 28 days from the date of delivery; and
- (b) the Company is given a reasonable opportunity after receiving the notice of examining such goods and the Customer (if asked to do so by the Company) returns such goods to the Company's place of business at the Company's cost for the examination to take place there.

(iii) The Company shall not be liable for a breach of the warranty in clause 15(i) if:

- (a) the Customer makes any further use of such goods after giving such notice; or
- (b) the defect arises because the Customer failed to follow the Company's oral or written instructions as to the storage, installation, commissioning, handling, use or maintenance of the goods or (if there are none) good trade practice; or
- (c) the Customer alters or repairs such goods without the written consent of the Company.

(iv) Subject to sub-paragraph (ii) and sub-paragraph (iii), if any of the goods do not conform with the warranty in sub-paragraph (i) hereof the Company shall at its option repair or replace such goods (or the defective part) or refund the price of such goods at the pro-rata Contract rate provided that, if the Company so requests, the Customer shall, at the Company's expense, return the goods or the part of such goods which is defective to the Company.

(v) If the Company complies with sub-paragraph (iv) hereof it shall have no further liability for a breach of the warranty in sub-paragraph (i) hereof in respect of such goods.

(vi) Any goods replaced shall belong to the Company.

16. LIMITATION OF LIABILITY

(i) The Customer must always rely on its own skill and judgement and recognise good civil engineering practice in relation to the goods and shall satisfy himself that goods specified are suitable for the Customer's intended purpose.

(ii) Subject to clauses 8, 10 and 15 the following provisions set out the entire financial liability of the Company (including any liability for the acts or omissions of its employees, agents and sub-contractors) to the Customer in respect of:

- (a) any breach of these conditions;
- (b) any use made or resale by the Customer of any of the goods, or of any product incorporating any of the goods; and
- (c) any representation, statement or tortious act or omission including negligence arising under or in connection with the contract.

(iii) All warranties, conditions and other terms implied by statute or common law (save for the conditions implied by section 12 of the Sale of Goods Act 1979) are, to the fullest extent permitted by law, excluded from the contract.

(iv) Nothing in these conditions excludes or limits the liability of the Company:

- (a) for death or personal injury caused by the Company's negligence; or
- (b) under section 2(3), Consumer Protection Act 1987; or
- (c) for any matter which it would be illegal for the Company to exclude or attempt to exclude its liability; or
- (d) for fraud or fraudulent misrepresentation.

(v) Subject to sub-paragraphs (iii) and (iv) hereof:

- (a) the Company's total liability in contract, tort (including negligence or breach of statutory duty), misrepresentation, restitution or otherwise, arising in connection with the performance or contemplated performance of the contract shall be limited to the contract price; and

(b) the Company shall not be liable to the Customer for any pure economic loss, loss of profit, loss of business, depletion of goodwill or otherwise, in each case whether direct, indirect or consequential, or any claims for consequential compensation whatsoever (howsoever caused) which arise out of or in connection with the contract.

(vi) The Company may assign the contract or any part of it to any person, firm or company.

It shall be the responsibility of the Customer to assume and to cover by insurance, if he so wishes, the risks which fall on the Customer through the operation of this clause or any other part of the contract.

17. CANCELLATION

(i) Orders placed by the Customer cannot be cancelled in whole or in part except with the Company's consent in writing and on the terms that the Customer shall pay for the goods in full unless the Company agrees otherwise in which event the Customer shall be liable for all costs, expenses and losses of any kind suffered or incurred by the Company resulting directly or indirectly from such cancellation.

(ii) Where the Company agrees to goods being returned following a cancellation it shall be the responsibility of the Customer, at its own expense, to return all such goods at such time as may be agreed to the Company's works or such other place as the Company may specify in good condition. If the goods are not so returned the Customer shall be liable for the full cost thereof. Risk in any goods returned shall not revert to the Company until a receipt of the cancelled goods is signed by a duly authorised representative of the Company.

18. SUSPENSION

In the event of the performance of any obligation accepted by the Company being prevented, delayed or in any way interfered with for any cause and/or reason whatsoever beyond the control of the Company including but not limited to:

- (i) Rules, regulations, requisitions or orders of the Government, Local Authority or any other Statutory Authority, war, riot, civil disturbance, strike, industrial action short of a strike, lockout, accident, breakdown, fire or by any other cause beyond its control.
- (ii) Shortage of labour or materials or non-delivery by the Company's suppliers or damage to or destruction of the whole or part of the goods.
- (iii) Any failure by the Customer to comply with any of the terms and conditions hereof.
- (iv) Any request or instruction by any third party, his servant or agent with whom the Customer is in contract with for the installation and testing of the goods; or
- (v) Any request or instruction of the Customer, his servants or agents.

The Company may at its option suspend performance or cancel its obligations under the contract without liability for any damage or loss of any kind whatsoever resulting therefrom such suspension or cancellation being without prejudice to the Company's rights to recover all sums owing to it in respect of goods delivered at the date thereof including but not limited to loss of profit and interest.

19. DEFAULT OF CUSTOMER

Should default be made by the Customer in complying with the contract, the Company at its option shall be entitled to suspend delivery until the default is made good or treat such default as a repudiation of the contract in which case the Customer shall (without prejudice to any right which the Company may have for the return of any goods or the payment of any compensation or damages by the Customer) pay the Company's reasonable charges for any costs or expenses incurred by the Company in the performance of the contract.

20. INSOLVENCY

(i) The Company shall have the right to terminate this contract forthwith on the occurrence of any of the following events:-

- (a) The issue of a petition to wind up or for an administration order in relation to the Customer.
- (b) The appointment of a receiver in relation to any property or asset of the Customer.
- (c) The appointment of an administrative receiver over the customer or its undertaking.
- (d) The Customer ceasing to trade or becoming insolvent or the passing of a resolution for the voluntary winding up of the Customer; or
- (e) The issue of a petition for bankruptcy order or if the Customer shall make or offer to make any arrangement or composition with its creditors or if a statutory demand is served under the Insolvency Act 1986 or any statutory modification or re-enactment thereof or if a Trustee is appointed in relation to the Customer or if any distress or execution shall be levied upon the property or assets of the Customer or on the dishonour of any cheque or negotiable instrument drawn by the Customer.

(ii) If this Clause applies then, without prejudice to any other right or remedy available to the Company, the Company shall be entitled to cancel the contract or suspend any further deliveries under the contract without any liability to the Customer, and if any goods have been delivered under any contract between the Company and the Customer but not paid for, the price shall immediately become due and payable notwithstanding any previous agreement or arrangements to the contrary.

21. COMPLIANCE

(i) No relaxation, forbearance, delay or indulgence by the Company in enforcing any of the terms and conditions of any contract shall prejudice the Company's rights to insist upon the strict compliance therewith nor shall the same constitute a waiver or an estoppel.

22. GOVERNING LAW

(i) These terms and conditions of supply and any contract between the Company and the Customer are governed by and are to be construed in accordance with the Laws of England and Wales to the exclusive jurisdiction of whose Courts the Customer agrees to submit.

(ii) Unless this contract expressly provides otherwise, a person who is not a party to this contract has no right to enforce any of its terms under the Contracts (Rights of Third Parties) Act 1999 (the "Act"), and if a person who is not a party to this Agreement is stated to have the right to enforce any of its terms under the Act, the parties may rescind or vary this contract (and any documents entered into pursuant to or in connection with it) without the consent of that person.

The image features a photograph of several stacks of light-colored precast concrete blocks. The blocks are rectangular with visible interlocking features on their top and side surfaces. They are arranged in multiple rows, creating a sense of depth. The background is slightly blurred, showing more stacks and a bright, possibly outdoor, setting. A semi-transparent orange grid pattern is overlaid on the right side of the image. In the lower-left foreground, there is a dark grey rectangular box containing the company logo.
