

Security Blocks

We offer a range of options when it comes to securing your premises against unwanted visitors, to manage site traffic and for use as HGV MOT test weights.

You can choose from the Security block, the Vee™ interlocking block, the Legato™ interlocking block, the Duo™ interlocking block or from our Marquee block ranges. Not only do these blocks provide security solutions they can also be used for various temporary works applications.

All systems come with integral lifting options and can be painted in your company logo/colours, Ministry of Transport approved chevrons, etc... and provide a much cheaper alternative when compared to hiring-in barriers.
